

Senior Civil Engineer (Land Development)

Astutus is a property development and infrastructure consultancy based in Eltham and specialising in civil engineering, project management, environmental consulting and international development assistance.

An exciting and challenging opportunity for an experienced civil engineer exists to lead projects (up to 400 lots) from inception to completion. Drawing on your previous experience in land development projects, you will be liaising directly with clientele and responsible for the ultimate delivery of projects including preparation of feasibility and servicing reports, civil engineering design, project management, approvals facilitation.

You will be actively involved in business development and real opportunities will be provided to the right person for equity and company leadership.

You shall be degree qualified in civil engineering with a minimum of 6 years experience in land development project management and engineering with skills in road, drainage, sewer and water design. You shall have outstanding communication skills and be outcome focussed in all that you do.

If you're ready to take control of your future, it's time to apply. To express your interest, please contact John Yalden on 1300 490 610 or email careers@astutus.com.au.

Confidentially assured.
